## SKILLS

- SAP ABAP Cloud (certified): RAP, CDS views, ABAP SQL, OOP ABAP, ABAP Dictionary
- C programming language (advanced projects at 42 Berlin)
- C++ (OOP fundamentals, currently expanding)
- Graphics programming / Ray tracing (miniRT)
- Shell Scripting
- Memory management and low-level programming
- Concurrency (Threads and processes)
- Parsing and building command interpreters
- Modular design and software architecture
- Debugging and problem-solving
- Teamwork and adaptability
- Professional communication

## CERTIFICATIONS

- SAP Certified - Back-End Developer - ABAP Cloud
  *Issued Jul 2026 · Expires Aug 2027 · Credly verified*
- SAP Certified - Integration Developer
  *Issued Sep 2026 · Valid until Oct 2027 · Credly verified*

## LANGUAGES

- Spanish | Native
- English | Advanced
- German | B2

## SUMMARY

Software developer in training at 42 Berlin (Rank 06), with growing expertise in C, concurrency, and system-level programming. SAP-certified in ABAP Cloud (Back-End Developer), with hands-on experience in RAP business objects, CDS views, and object-oriented ABAP. Experienced in building complex projects including a POSIX shell and concurrency simulations. Motivated, detail-oriented, and collaborative.

## EXPERIENCE

### SOFTWARE DEVELOPER STUDIES

42 Berlin. Berlin, Germany | Nov 2024 - Present | Rank 06

- Completed the Piscine (intensive one-month coding bootcamp) and progressed to Rank 06 of the core curriculum. Built and completed multiple C projects.
- Gained experience in peer-to-peer learning and code review as part of 42's collaborative methodology.
- Completed the SAP ABAP Cloud back-end developer track through the SAP Learning Hub, earning SAP certification (Jul 2026). Practical work covering RAP, CDS views, ABAP SQL and dictionary objects.
- Currently expanding skills into C++ (OOP fundamentals).
- AI-assisted development (Joule in ADT, LLMs) for faster onboarding and code review.

### ADDITIONAL EXPERIENCE

Berlin, Menorca, Santiago de Chile | 2015 - 2024

Several years of experience as a waiter in international hospitality settings in Berlin, Menorca, and Santiago de Chile (Hoxton Hotel, Montraw Restaurant, Carema Beach Hotel, ProBar Santiago). Additionally worked as a physiotherapist and personal trainer (Fast Chile, Physica). These experiences strengthened my teamwork, communication under pressure, client-oriented mindset, and adaptability in multicultural environments.

## EDUCATION

### SOFTWARE DEVELOPER

42 Berlin. Berlin, Germany | Nov 2024 - Present

### BACHELOR IN PHYSIOTHERAPY

Universidad Finis Terrae. Santiago de Chile | Mar 2011 - Mar 2018

## PROJECTS

**Webserver** C++ / Network Programming

Co-developed (team of two) a fully functional HTTP/1.1 web server from scratch in C++ using non-blocking sockets and poll. Custom request parsing, status code handling and CGI execution in the event loop. Leak-free memory management; stress-tested with siege (25 concurrent clients, 100% availability) and 100 MB requests.

**Inception** DevOps / System Administration

Secure multi-container infrastructure on a Virtual Machine using Docker and Docker-compose: Nginx reverse proxy with TLS/SSL, WordPress and MariaDB, with services initialized by custom Bash scripts.

**miniRT** C, MiniLibX

Ray tracer rendering 3D scenes from .rt files. Supports planes, spheres, and cylinders with ambient and diffuse lighting and shadows. Vector math and ray-object intersection.

**Minishell** C, Linux

POSIX-compatible shell with pipes, redirections, wildcard expansion, and logical operators. Robust parsing, process handling, and memory-safe execution.

**Pipex** C, Linux

Pipeline recreation with multiple commands and file redirection. Unlimited pipes and heredoc mode. Strengthened process creation and IPC skills.

**Philosophers** C, Linux

Dining Philosophers concurrency project. Threads + mutexes (mandatory), processes + semaphores (bonus). Deadlock prevention and synchronization.
